

SQL Queries

Write the following SQL Statements on the database. Show the statements along with screenshots of the results:

Q1. Retrieve the names and the address of all the customers whose names start with a 'J' or 'M'.

Column headers:

Cname	Street	City	StateAb	ZipCode
-------	--------	------	---------	---------

Q2. Retrieve the names, start dates, and Telephone numbers of all EMPLOYEES who are interns from the Institute 'UTA'

Column headers:

Ename	Sdate	Telno
-------	-------	-------

Q3. Retrieve the names of CUSTOMERS who have placed orders with a total amount greater than \$10. Include the total amount formatted as a dollar value (Example: \$1.00)

Column headers: Cname TotalAmount

Q4. Retrieve the names, city, and class names of VENDORS who have CONTRACT for a course with a start date '2024-06-25'.

Column headers: Vname City Ctname

Q5. Retrieve the names of ITEMS that have never been included/purchased in any of the CUSTOMER's orders.

Column headers: Iname

Q6. Which are the top 5 ITEMS that have been sold the most, and what is the total quantity sold for each item?

Column headers: Iname TotalSold

Q7. Retrieve the IDs, names, and city of CUSTOMER's who placed ORDERS and also gave FEEDBACK. Ensure that each customer record appears only once in the result set.

Column headers: CID Cname City Telephone

Q8. Which month has the highest number of orders in the ORDER table, considering the month names instead of numeric values (For example convert 7 to July)?

Column headers: OrderMonth OrderCount

Q9. What is the average delivery time for all ORDERS, rounded to the nearest whole number and expressed in the format 'X days' (Example output format - 5 days)?

Column headers: AverageDeliveryTime

Q10. Find the total revenue generated from all ORDERS for each STORE, along with the store name and city.

Column headers: StoreName City TotalRevenue

Q11. Write and Execute a command to delete a record that violates any referential integrity constraint. List the command and state the message produced by the DBMS.

Q12. Write and Execute 3 insert commands for any table that attempt to insert records, such that the records violate the explicit schema-based constraints (Key, Entity Integrity, or Referential Integrity constraints). Make each of the 3 inserts violate a different type of integrity constraint. Include the insert statements and the error messages produced.

Q13. Write and Execute an update command for **vendor_store** table that attempts to update records in child rows, such that the record violates the foreign key constraint. Include the update statement and the error message.

Q1.

```
SELECT Cname, Street, City, StateAb, ZipCode FROM CUSTOMER Where Cname LIKE 'J%' or Cname LIKE 'M%';
```
